

Pre-Emptive Strike Against Grime

Bike Brite Moto-Mask ON is a temporary, invisible barrier between your bike's exterior finishes and nasty road sludge. The clear shield is sprayed onto paint, chrome, and metal surfaces, and protects against penetration of dirt and other various filth that is attracted to your bike. At the end of your ride, simply wipe off the layer of dust and splattered bug carcasses. Your bike can have a freshly detailed look after days of cruising—perfect for any rally or bike show. To remove the residue-free spray, simply spray on Moto-Mask OFF or give your chopper a well-deserved bubble bath.
